ABSTRACT

The reporting booklet is required by the Census Data System (CDS) of the Management Information System for Occupational Education (MISOE); it contains the reporting forms which collect enrollment data by department at the end of the school year. CDS, one of two major subsystems of the integrated management information system, was developed to provide occupational education managers with comprehensive data on which to base rational management decisions. Essentially, CDS contains descriptive information systematically structured in a manner which allows it to be used as a basis for sampling evaluative research studies. CDS collects and stores census data for all school systems offering occupational education programs, including all data formerly collected by the Annual Federal Report for Occupational Information, except followup data. (Author/AJ)
